Original Abstracts:

A computer-implemented quality review process is introduced in which account statements may be individually selected from a batch printing run. Selected statements may then be viewed, edited, approved and released for printing. Account statements may also be unapproved, unreleased, purged or regenerated after one or more reviews are conducted. The quality review process...

Claims:

1. A method for enabling a review of individual account statements assembled for batch printing, comprising: displaying a directory of individual account statements assembled for batch printing; preventing the batch printing until all individual account statements are approved and released for printing; receiving, from a user, a selection of an account statement from the directory for review; presenting the selected account statement to the user; and receiving, from the user after said presenting, one of: an approval of the selected account statement, a rejection of the selected account statement, a correction of the selected account statement, a request for regeneration of the selected account statement, and...
